It may not be generally known that Comenius was once solicited to become President of Harvard College. The following is a quotation from Vol. II, p. 14, of Cotton Mather's MAGNALIA:

“That brave old man, Johannes Amos Commenius, the fame of whose worth has been TRUMPETTED as far as more than three languages (whereof everyone is indebted unto his JANUA) could carry it, was indeed agreed withal, by one Mr. Winthrop in his travels through the LOW COUNTRIES, to come over to New England, and illuminate their Colledge and COUNTRY, in the quality of a President, which was now become vacant. But the solicitations of the Swedish Ambassador diverting him another way, that incomparable Moravian became not an American.”

This was on the resignation of President Dunster, in 1654—

EDITOR'S PREFACE.

When it is remembered that this work is not only an educational classic of prime importance, but that it was the first picture-book ever made for children and was for a century the most popular text-book in Europe, and yet has been for many years unattainable on account of its rarity, the wonder is, not that it is reproduced now but that it has not been reproduced before. But the difficulty has been to find a satisfactory copy. Many as have been the editions, few copies have been preserved. It was a book children were fond of and wore out in turning the leaves over and over to see the pictures. Then as the old copper-plates became indistinct they were replaced by wood-engravings, of coarse execution, and often of changed treatment. Von Raumer complains that the edition of 1755 substitutes for the original cut of the Soul, (No. 43, as here given,) a picture of an eye, and in a table the figures I. I. II. I. I. II., and adds that it is difficult to recognize in this an expressive psychological symbol, and to explain it. In an edition I have, published in Vienna in 1779, this cut is omitted altogether, and indeed there are but 82 in place of the 157 found in earlier editions, the following, as numbered in this edition, being omitted :

1, the alphabet, 2, 36, 43, 45, 66, 68, 75, 76, 78-80, 87, 88, 92-122, 124, 126, 128, 130-141.

(iii)

On the other hand, the Vienna edition contains a curious additional cut. It gives No. 4, the Heaven, practically as in this edition, but puts another cut under it in which the earth is revolving about the sun; and after the statement of Comenius, "*Coelum rotatur, et ambit terram, in medio stantem*" interpolates: "*prout veteres crediderunt; recentiores enim defendunt motum terrae circa solem*" [as the ancients used to think; for later authorities hold that the motion of the earth is about the sun.]

Two specimen pages from another edition are inserted in Payne's Compayré's History of Education (between pp. 126, 127). The cut is the representative of No. 103 in this edition, but those who compare them will see not only how much coarser is the execution of the wood-cut Prof. Payne has copied, but what liberties have been taken with with the design. The only change in the Latin text, however, is from *Designat Figuras rerum* in the original, to *Figuram rerum designat*.

In this edition the cuts are unusually clear copies of the copper-plates of the first edition of 1658, from which we have also taken the Latin text. The text for the English translation is from the English edition of 1727, in which for the first time the English words were so arranged as to stand opposite their Latin equivalents.

The cuts have been reproduced with great care by the photographic process. I thought best not to permit them to be retouched, preferring occasional indistinctness to modern tampering with the originals that would make them less authentic.

The English text is unchanged from that of the 1727 edition, except in rare instances where substitutions have been made for single words not now permissible. The typography suggests rather than imitates the quaintness of the original, and the paper was carefully selected to produce so far as practicable the impression of the old hand-presses.

In short my aim has been to put within the reach of teachers at a moderate price a satisfactory reproduction of this important book; and if the sale of the *Orbis Pictus* seems to warrant it, I hope subsequently to print as a companion volume the *Vestibulum* and *Fanua* of the same author, of which I have choice copies.

COMMENTS UPON THE ORBIS PICTUS.

During four years he here prosecuted his efforts in behalf of education with commendable success, and wrote, among other works, his celebrated *Orbis Pictus*, which has passed through a great many editions, and survived a multitude of imitations.—SMITH'S HISTORY OF EDUCATION, N. Y., 1842, p. 129.

The most eminent educator of the seventeenth century, however, was John Amos Comenius. . . . His *Orbis Sensualium Pictus*, published in 1657, enjoyed a still higher renown. The text was much the same with the *Janua*, being intended as a kind of elementary encyclopædia; but *it differed from all previous text-books*, in being illustrated with pictures, on copper and wood, of the various topics discussed in it. This book was universally popular. In those portions of Germany where the schools had been broken up by the "Thirty years' war," mothers taught their children from its pages. Corrected and amended by later editors, it continued for nearly two hundred years, to be a text-book of the German schools.—HISTORY AND PROGRESS OF EDUCATION, BY PHILOBIBLIUS, N. Y., 1860, p. 210.

The "*Janua*" would, therefore, have had but a short-lived popularity with teachers, and a still shorter with learners, if Comenius had not carried out his

principle of appealing to the senses, and called in the artist. The result was the "Orbis Pictus," a book which proved a favorite with young and old, and maintained its ground in many a school for more than a century....I am sorry I cannot give a specimen of this celebrated book with its quaint pictures. The artist, of course, was wanting in the technical skill which is now commonly displayed even in the cheapest publications, but this renders his delineations none the less entertaining. As a picture of the life and manners of the seventeenth century, the work has great historical interest, which will, I hope, secure for it another English edition.—QUICK'S EDUCATIONAL REFORMERS, 1868; Syracuse edition, p. 79.

But the principle on which he most insisted is that the teaching of words and things must go together, hand in hand. When we consider how much time is spent over new languages, what waste of energy is lavished on mere preparation, how it takes so long to lay a foundation that there is no time to lay a building upon it, we must conclude that it is in the acceptance and development of this principle that the improvement of education will in the future consist. Any one who attempts to inculcate this great reform will find that its first principles are contained in the writings of Comenius.—ENCYCLOPÆDIA BRITANNICA, 9th edition, vii. 674.

The first edition of this celebrated book was published at Nuremberg in 1657; soon after a translation was made into English by Charles Hoole. The last English edition appeared in 1777, and this was reprinted in America in 1812. This was the first il-

lustrated school-book, and was the first attempt at what now passes under the name of "object lessons."—SHORT HISTORY OF EDUCATION, W. H. PAYNE, Syracuse, 1881, p. 103.

Of these, the "Janua" and the "Orbis" were translated into most European and some of the Oriental languages. It is evident that these practices of Comenius contain the germs of things afterwards connected with the names of Pestalozzi and Stow. It also may be safely assumed that many methods that are now in practical use, were then not unknown to earliest teachers.—GILL'S SYSTEMS OF EDUCATION, London, 1876, p. 13.

The more we reflect on the method of Comenius, the more we shall see it is replete with suggestiveness, and we shall feel surprised that so much wisdom can have lain in the path of schoolmasters for two hundred and fifty years, and that they have never stooped to avail themselves of its treasures.—BROWNING'S INTRODUCTION TO THE HISTORY OF EDUCATIONAL THEORIES, 1882, New York edition, p. 67.

The "Orbis Pictus," the first practical application of the intuitive method, had an extraordinary success, and has served as a model for the innumerable illustrated books which for three centuries have invaded the schools.—COMPAYRE'S HISTORY OF PEDAGOGY, Payne's translation, Boston, 1886, p. 127.

He remained at Patak four years, which were characterized by surprising literary activity. During this short period he produced no less than fifteen different works, among them his "World Illustrated" (*Orbis Pictus*), the most famous of all his writings.

It admirably applied the principle that words and things should be learned together....The "World Illustrated" had an enormous circulation, and remained for a long time the most popular text-book in Europe.—PAINTER'S HISTORY OF EDUCATION, N.Y., 1886, p. 206.

Or, si ce livre n'est qu'un equivalent le la véritable intuition; si, ensuite, le contenu du tout paraît fort defectueux, au point de vue de la science de nos jours; si, enfin, un effort exagéré pour l'intégrité de la conception de l'enfant a créé, pour les choses modernes, trop de dénominations latines qui paraissent douteuses, l'*Orbis pictus* était pourtant, pour son temps, une oeuvre très originale et très spirituelle, qui fit faire un grand progrès à la pédagogie et servit longtemps de livre d'école utile et de modèle à d'innombrables livres d'images, souvent pires.—HISTOIRE D'ÉDUCATION, FREDERICK DITTES, Redolfi's French translation, Paris, 1880, p. 178.

Here Comenius wrote, among others, his second celebrated work the "Orbis Pictus." He was not, however, able to finish it in Hungary for want of a skilful engraver on copper. For such a one he carried it to Michael Endter, the bookseller at Nuremberg, but the engraving delayed the publication of the book for three years more. In 1657 Comenius expressed the hope that it would appear during the next autumn. With what great approbation the work was received at its first appearance, is shown by the fact that within two years, in 1659, Endter had published a second enlarged edition.—KARL VON

RAUMER, translated in Barnard's Journal of Education, v. 260.

The "Janua" had an enormous sale, and was published in many languages, but the editions and sale of the "Orbis Pictus" far exceeded those of the "Janua," and, indeed, for some time it was the most popular text-book in Europe, and deservedly so.—LAURIE'S JOHN AMOS COMENIUS, Boston edition, p. 185.

THE AUTHOR'S PREFACE TO THE READER.

Instruction is the means to expel Rudeness, with which young wits ought to be well furnished in Schools: But so, as that the teaching be 1. *True*, 2. *Full*, 3. *Clear*, and 4. *Solid*.

1. It will be *true*, if nothing be taught but such as is beneficial to ones life; lest there be a cause of complaining afterwards. We know not necessary things, because we have not learned things necessary.

2. It will be *full*, if the mind be polished for wisdom, the tongue for eloquence, and the hands for a neat way of living. This will be that *grace* of one's life, *to be wise, to act, to speak*.

3, 4. It will be *clear*, and by that, firm and *solid*, if whatever is taught and learned, be not obscure, or confused, but apparent, distinct, and articulate, as the fingers on the hands.

The ground of this business, is, that sensual objects may be rightly presented to the senses, for fear they may not be received. I say, and say it again aloud, that this last is the foundation of all the rest: because we can neither act nor speak wisely, unless we first rightly understand all the things which are

to be done, and whereof we are to speak. Now there is nothing in the understanding, which was not before in the sense. And therefore to exercise the senses well about the right perceiving the differences of things, will be to lay the grounds for all wisdom, and all wise discourse, and all discreet actions in ones course of life. Which, because it is commonly neglected in schools, and the things which are to be learned are offered to scholars, without being understood or being rightly presented to the senses, it cometh to pass, that the work of teaching and learning goeth heavily onward, and affordeth little benefit.

See here then a new help for schools, A Picture and Nomenclature of all the chief things in the world, and of men's actions in their way of living: Which, that you, good Masters, may not be loath to run over with your scholars, I will tell you, in short, what good you may expect from it.

It is *a little Book*, as you see, of no great bulk, yet a brief of the whole world, and a whole language: full of Pictures, Nomenclatures, and Descriptions of things.

I. *The Pictures* are the representation of all visible things, (to which also things invisible are reduced after their fashion) of the whole world. And that in that very order of things, in which they are described in the *Fanua Latinæ Linguae*; and with that fulness, that nothing very necessary or of great concernment is omitted.

II. *The Nomenclatures* are the Inscriptions, or Titles set every one over their own Pictures, expressing the whole thing by its own general term.

III. *The Descriptions* are the explications of the parts of the Picture, so expressed by their own proper terms, as that same figure which is added to every piece of the picture, and the term of it, always sheweth what things belongeth one to another.

Which such Book, and in such a dress may (I hope) serve,

I. To entice witty children to it, that they may not conceit a torment to be in the school, but dainty fare. For it is apparent, that children (even from their infancy almost) are delighted with Pictures, and willingly please their eyes with these lights: And it will be very well worth the pains to have once brought it to pass, that scare-crows may be taken away out of Wisdom's Gardens.

II. This same little Book will serve to stir up the Attention, which is to be fastened upon things, and even to be sharpened more and more: which is also a great matter. For the Senses (being the main guides of childhood, because therein the mind doth not as yet raise up itself to an abstracted contemplation of things) evermore seek their own objects, and if they be away, they grow dull, and wry themselves hither and thither out of a weariness of themselves: but when their objects are present, they grow merry, wax lively, and willingly suffer themselves to be fastened upon them, till the thing be sufficiently discerned. This Book then will do a good piece of service in taking (especially flickering) wits, and preparing them for deeper studies.

III. Whence a third good will follow; that children being won hereunto, and drawn over with this

way of heeding, may be furnished with the knowledge of the prime things that are in the world, by sport and merry pastime. In a word, this Book will serve for the more pleasing using of the *Vestibulum* and *Fanua Linguarum*, for which end it was even at the first chiefly intended. Yet if it like any, that it be bound up in their native tongues also, it promiseth three good thing of itself.

I. First it will afford a device for learning to read more easily than hitherto, especially having a symbolical alphabet set before it, to wit, the characters of the several letters, with the image of that creature, whose voice that letter goeth about to imitate, pictured by it. For the young *Abc* scholar will easily remember the force of every character by the very looking upon the creature, till the imagination being strengthened by use, can readily afford all things; and then having looked over *a table of the chief syllables* also (which yet was not thought necessary to be added to this book) he may proceed to the viewing of the Pictures, and the inscriptions set over 'em. Where again the very looking upon the thing pictured suggesting the name of the thing, will tell him how the title of the picture is to be read. And thus the whole book being gone over by the bare titles of the pictures, reading cannot but be learned; and indeed too, which thing is to be noted, without using any ordinary tedious spelling, that most troublesome torture of wits, which may wholly be avoided by this method. For the often reading over the Book, by those larger descriptions of things, and which are set after the Pictures, will be able perfectly to beget a habit of reading.

II. The same book being used in English, in English Schools, will serve for the perfect learning of the whole English tongue, and that from the bottom; because by the aforesaid descriptions of things, the words and phrases of the whole language are found set orderly in their own places. And a short English Grammar might be added at the end, clearly resolving the speech already understood into its parts; shewing the declining of the several words, and reducing those that are joined together under certain rules.

III. Thence a new benefit cometh, that that very English Translation may serve for the more ready and pleasant learning of the Latin tongue: as one may see in this Edition, the whole book being so translated, that every where one word answereth to the word over against it, and the book is in all things the same, only in two idioms, as a man clad in a double garment. And there might be also some observations and advertisements added in the end, touching those things only, wherein the use of the Latin tongue differeth from the English. For where there is no difference, there needeth no advertisement to be given. But, because the first *tasks of learners ought to be little and single*, we have filled this first book of training one up to see a thing of himself, with nothing but rudiments, that is, with the chief of things and words, or with the grounds of the whole world, and the whole language, and of all our understanding about things. If a more perfect description of things, and a fuller knowledge of a language, and a clearer light of the understanding be

sought after (as they ought to be) they are to be found somewhere whither there will now be an easy passage by this our *little Encyclopædia* of things subject to the senses. Something remaineth to be said touching the more chearful use of this book.

I. Let it be given to children into their hands to delight themselves withal as they please, with the sight of the pictures, and making them as familiar to themselves as may be, and that even at home before they be put to school.

II. Then let them be examined ever and anon (especially now in the school) what this thing or that thing is, and is called, so that they may see nothing which they know not how to name, and that they can name nothing which they cannot shew.

III. And let the things named them be shewed, not only in the Picture, but also in themselves; for example, the parts of the body, clothes, books, the house, utensils, &c.

IV. Let them be suffered also to imitate the Pictures by hand, if they will, nay rather, let them be encouraged, that they may be willing: first, thus to quicken the attention also towards the things; and to observe the proportion of the parts one towards another; and lastly to practise the nimbleness of the hand, which is good for many things.

V. If anything here mentioned, cannot be presented to the eye, it will be to no purpose at all to offer them by themselves to the scholars; as colours, relishes, &c., which cannot here be pictured out with ink. For which reason it were to be wished, that things rare and not easy to be met withal at home,

might be kept ready in every great school, that they may be shewed also, as often as any words are to be made of them, to the scholars.

Thus at last this school would indeed become a school of things obvious to the senses, and an entrance to the school intellectual. But enough : Let us come to the thing it self.

THE TRANSLATOR, TO ALL JUDICIOUS
AND INDUSTRIOUS SCHOOL-MASTERS.

Gentlemen.

There are a few of you (I think) but have seen, and with great willingness made use of (or at least perused,) many of the Books of this of this well-deserving Author Mr. John Comenius, which for their profitableness to the speedy attainment of a language, have been translated in several countries, out of Latin into their own native tongue.

Now the general verdict (after trial made) that hath passed, touching those formerly extant, is this, that they are indeed of singular use, and very advantageous to those of more discretion, (especially to such as already have a smattering of Latin) to help their memories to retain what they have scatteringly gotten here and there, to furnish them with many words, which (perhaps) they had not formerly read, or so well observed; but to young children (whom we have chiefly to instruct) as those that are ignorant altogether of things and words, and prove rather a meer toil and burthen, than a delight and furtherance.

For to pack up many words in memory, of things not conceived in the mind, is to fill the head with empty imaginations, and to make the learner more

to admire the multitude and variety (and thereby, to become discouraged,) than to care to treasure them up, in hopes to gain more knowledge of what they mean.

He hath therefore in some of his latter works seemed to move retrograde, and striven to come nearer the reach of tender wits: and in this present Book, he hath, according to my judgment, descended to the very bottom of what is to be taught, and proceeded (as nature it self doth) in an orderly way; first to exercise the senses well, by representing their objects to them, and then to fasten upon the intellect by impressing the first notions of things upon it, and linking them on to another by a rational discourse. Whereas indeed, we, generally missing this way, do teach children as we do parrots, to speak they know not what, nay which is worse, we, taking the way of teaching little ones by Grammar only at the first, do puzzle their imaginations with abstractive terms and secondary intentions, which till they be somewhat acquainted with things, and the words belonging to them, in the language which they learn, they cannot apprehend what they mean. And this I guess to be the reason, why many great persons do resolve sometimes not to put a child to school till he be at least eleven or twelve years of age, presuming that he having then taken notice of most things, will sooner get the knowledge of the words which are applyed to them in any language. But the gross misdemeanor of such children for the most part, have taught many parents to be hasty enough to send their own to school, if not that they may learn, yet (at least) that they might be kept out

of harm's way; and yet if they do not profit for the time they have been at school, (no respect at all being had for their years) the Master shall be sure enough to bear the blame.

So that a School-master had need to bend his wits to come within the compass of a child's capacity of six or seven years of age (seeing we have now such commonly brought to our Grammar-schools to learn the Latin Tongue) and to make that they may learn with as much delight and willingness, as himself would teach with dexterity and ease. And at present I know no better help to forward his young scholars than this little Book, which was for this purpose contrived by the Author in the German and Latin Tongues.

What profitable use may be had thereof, respecting chiefly that his own country and language, he himself hath told you in his preface; but what use we may here make of it in our Grammar-schools, as it is now translated into English, I shall partly declare; leaving all other men, according to my wont, to their own discretion and liberty, to use or refuse it, as they please. So soon then as a child can read English perfectly, and is brought to us to school to learn Latin, I would have him together with his Accidence, to be provided of this Book, in which he may at least once a day (beside his Accidence) be thus exercised.

I. Let him look over the pictures with their general titles and inscriptions, till he be able to turn readily to any one of them, and to tell its name either in English or Latin. By this means he shall

have the method of the Book in his head; and be easily furnished with the knowledge of most things; and instructed how to call them, when at any time he meeteth with them elsewhere, in their real forms.

II. Let him read the description at large: First in English, and afterward in Latin, till he can readily read, and distinctly pronounce the words in both Languages, ever minding how they are spelled. And withal, let him take notice of the figures inserted, and to what part of the picture they direct by their like till he be well able to find out every particular thing of himself, and to name it on a sudden, either in English or Latin. Thus he shall not only gain the most primitive words, but be understandingly grounded in Orthography, which is a thing too generally neglected by us; partly because our English schools think that children should learn it at the Latin, and our Latin schools suppose they have already learn'd it at the English; partly, because our common Grammar is too much defective in this part, and scholars so little exercised therein, that they pass from schools to the Universities and return from thence (some of them) more unable to write true English, than either Latin or Greek. Not to speak of our ordinary Tradesmen, many of whom write such false English, that none but themselves can interpret what they scribble in their bills and shop-books.

III. Then let him get the Titles and Descriptions by heart, which he will more easily do, by reason of these impressions which the viewing of the pictures hath already made in his memory. And now let him also learn, 1. To construe, or give the words one by

one, as they answer one another in Latin and English. 2. To Parse, according to the rules, (which I presume by this time) he hath learn'd in the first part of his Accidence; where I would have him tell what part of Speech any word is, and then what accidents belong to it; but especially to decline the nouns and conjugate the verbs according to the Examples in his Rudiments; and this doing will enable him to know the end and use of his Accidence. As for the Rules of Genders of Nouns, and the Præter-perfect-tenses and Supines of Verbs, and those of Concordance and Construction in the latter part of the Accidence, I would not have a child much troubled with them, till by the help of this Book he can perfectly practise so much of Etymology, as concerns the first part of his Accidence only. For that, and this book together, being thoroughly learn'd by at least thrice going them over, will much prepare children to go chearfully forward in their Grammar and School-Authors, especially, if whilst they are employed herein, they be taught also to write a fair and legible hand.

There is one thing to be given notice of, which I wish could have been remedied in this Translation; that the Book being writ in high-Dutch doth express many things in reference to that Country and Speech, which cannot without alteration of some Pictures as well as words be expressed in ours: for the Symbolical Alphabet is fitted for German children rather than for ours. And whereas the words of that Language go orderly one for one with the Latin, our English propriety of Speech will not admit the like. Therefore it will behove those Masters that intend

to make use of this Book, to construe it verbatim to their young Scholars, who will quickly learn to do it of themselves, after they be once acquainted with the first words of Nouns, and Verbs, and their manner of variation.

Such a work as this, I observe to have been formerly much desired by some experienced Teachers, and I my self had some years since (whilst my own Child lived) begun the like, having found it most agreeable to the best witted Children, who are most taken up with Pictures from their Infancy, because by them the knowledge of things which they seem to represent (and whereof Children are as yet ignorant) are most easily conveyed to the Understanding. But for as much as the work is now done, though in some things not so completely as it were to be wished, I rejoyce in the use of it, and desist in my own undertakings for the present. And because any good thing is the better, being the more communicated; I have herein imitated a Child who is forward to impart to others what himself has well liked. You then that have the care of little Children, do not much trouble their thoughts and clog their memories with bare Grammar Rudiments, which to them are harsh in getting, and fluid in retaining; because indeed to them they signifie nothing, but a mere swimming notion of a general term, which they know not what it meaneth, till they comprehend particulars, but by this or the like subsidiary, inform them, first with some knowledge of things and words wherewith to express them, and then their Rules of speaking will be better understood and more firmly kept in mind. Else how should a Child conceive what a Rule mean-

eth, when he neither knoweth what the Latin word importeth, nor what manner of thing it is which is signified to him in his own native Language, which is given him thereby to understand the Rule? For Rules consisting of generalities, are delivered (as I may say) at a third hand, presuming first the things, and then the words to be already apprehended touching which they are made. I might indeed enlarge upon this Subject, it being the very Basis of our Profession, to search into the way of Childrens taking hold by little and little of what we teach them, that so we may apply ourselves to their reach: But I leave the observation thereof to your own daily exercise, and experience got thereby.

And I pray God, the fountain and giver of all wisdom, that hath bestowed upon us this gift of Teaching, so to inspire and direct us by his Grace, that we may train up Children in his Fear and in the knowledge of his Son Jesus Christ our Lord; and then no doubt our teaching and their learning of other things subordinate to these, will by the assistance of his blessed Spirit make them able and willing to do him faithful Service both in Church and Commonwealth, as long as they live here, that so they may be eternally blessed with him hereafter. This, I beseech you, beg for me and mine, as I shall daily do for you and yours, at the throne of God's heavenly grace; and remain while I live

Ready to serve you, as I truly love and honour you,
and labour willingly in the same Profession with
you,

The Judgment of Mr. Hezekiah Woodward, sometimes an eminent Schoolmaster in LONDON, touching a work of this Nature ; in his Gate to Science, chap. 2.

Certainly *the use of Images or Representations is great :*

If we could make our words as legible to Children as Pictures are, their information therefrom would be quickned and surer. But so we cannot do, though we must do what we can. And if we had Books, wherein are the Pictures of all Creatures, Herbs, Beasts, Fish, Fowls, they would stand us in great stead. For Pictures are the most intelligible Books that Children can look upon. They come closest to Nature, nay, saith Scaliger, Art exceeds her.

AN ADVERTISEMENT CONCERNING THIS EDITION.

AS there are some considerable Alterations in the present Edition of this Book from the former, it may be expected an Account should be given of the Reasons for them. 'Tis certain from the Author's Words, that when it was first published, which was in Latin and Hungary, or in Latin and High-Dutch; every where one word answer'd to another over-against it: This might have been observ'd in our English Translation, which wou'd have fully answer'd the design of COMENIUS, and have made the Book much more useful: But Mr. Hoole, (whether out of too much scrupulousness to disturb the Words in some places from the order they were in, or not sufficiently considering the Inconveniencies of having the Latin and English so far asunder) has made them so much disagree, that a Boy has sometimes to seek 7 or 8 lines off for the corresponding Word; which is no small trouble to Young Learners who are at first equally unacquainted with all Words, in a Language they are strangers to, except it be such as have Figures of Reference, or are very like in sound; and thus may perhaps, innocently enough join an Adverb in one Tongue, to a Noun in the other; whence may

appear the Necessity of the Translation's being exactly literal, and the two Languages fairly answering one another, Line for Line.

If it be objected, such a thing cou'd not be done (considering the difference of the Idioms) without transplacing Words here and there, and putting them into an order which may not perhaps be exactly classical; it ought to be observed, this is design'd for Boys chiefly, or those who are just entering upon the Latin Tongue, to whom every thing ought to be made as plain and familiar as possible, who are not, at their first beginning, to be taught the elegant placing of Latin, nor from such short Sentences as these, but from Discourses where the Periods have a fuller Close. Besides, this way has already taken (according to the Advice of very good Judges,) in some other School-Books of Mr. Hoole's translating, and found to succeed abundantly well.

Such Condescensions as these, to the capacities of young Learners are certainly very reasonable, and wou'd be most agreeable to the Intentions of the Ingenious and worthy Author, and his design to suit whatever he taught, to their manner of apprehending it. Whose Excellency in the art of Education made him so famous all over Europe, as to be solicited by several States and Princes to go and reform the Method of their Schools; and whose works carried that Esteem, that in his own Life-time some part of them were not only translated into 12 of the usual Languages of Europe, but also into the *Arabic*, *Turkish*, *Persian*, and *Mogolic* (the common Tongue of all that part of the *East-Indies*) and since his death, into

the *Hebrew*, and some others. Nor did they want their due Encouragement here in *England*, some Years ago; 'till by an indiscreet use of them, and want of a thorow acquaintance with his Method, or unwillingness to part from their old road, they began to be almost quite left off: Yet it were heartily to be wish'd, some Persons of Judgment and Interest, whose Example might have an influence upon others, and bring them into Reputation again, wou'd revive the COMENIAN METHOD, which is no other, than to make our Scholars learn with Delight and cheerfulness, and to convey a solid and useful Knowledge of Things, with that of Languages, in an easy, natural and familiar way. *Didactic Works* (as they are now collected into one volume) for a speedy attaining the Knowledge of Things and Words, join'd with the Discourses of Mr. Lock* and 2 or 3 more out of our own Nation, for forming the Mind and settling good Habits, may doubtless be look'd upon to contain the most reasonable, orderly, and completed System of the Art of Education, that can be met with.

Yet, alas! how few are there, who follow the way they have pointed out? tho' every one who seriously considers it, must be convinc'd of the Advantage; and the generality of Schools go on in the same old dull road, wherein a great part of Children's time is lost in a tiresome heaping up a Pack of dry and unprofitable, or pernicious Notions (for surely little

better can be said of a great part of that Heathenish stuff they are tormented with; like the feeding them with hard Nuts, which when they have almost broke their teeth with cracking, they find either deaf or to contain but very rotten and unwholesome Kernels) whilst Things really perfected of the understanding, and useful in every state of Life, are left unregarded, to the Reproach of our Nation, where all other Arts are improved and flourish well, only this of Education of Youth is at a stand; as if that, the good or ill management of which is of the utmost consequence to all, were a thing not worth any Endeavors to improve it, or was already so perfect and well executed that it needed none, when many of the greatest Wisdom and Judgment in several Nations, have with a just indignation endeavor'd to expose it, and to establish a more easy and useful way in its room.

'Tis not easy to say little on so important a subject, but thus much may suffice for the present purpose. The Book has merit enough to recommend it self to those who know how to make a right use of it. It was reckon'd one of the Author's best performances; and besides the many Impressions and Translations it has had in parts beyond Sea, has been several times reprinted here. It was endeavor'd no needless Alterations shou'd be admitted in this Edition, and as little of any as cou'd consist with the design of making it plain and useful; to shun the offence it might give to some; and only the Roman and Italic Character alternately made use of, where transplacings of Words cou'd be avoided.

These, being tempted by the *Devil* under the shape of a *Serpent*, 3. when they had eaten of the fruit of the *forbidden Tree*, 4. were condemned, 5. to misery and death, with all their posterity, and cast out of *Paradise*, 6.

XLI.

Canales & Ossa.

The Chanels of the Body are | Canales Corporis sunt

the *Veins*, carrying
the Blood from the Liver;
The *Arteries* (carrying)
Heart and Life from the
Heat ;

The *Nerves* (carrying)
Sense and Motion
throughout the Body from
the *Brain*.

You shall find these
three, 1. everywhere
joined together.

Besides, from the Mouth
into the Stomach is
the *Gullet*, 2. the
way of the meat and drink;
and by it to the Lights, the
Wezand, 5. for breathing ;
from the Stomach to the
Anus is a great *Intestine*, 3.

The Outward and Inward Senses.

Sensus externi & interni.

There are five outward
Senses ;

The *Eye*, 1. seeth Col-
ours, what is white or
black, green or blew,
red or yellow.

The *Ear*, 2. heareth
Sounds, both natural,
Voices and Words ;
and artificial,

Sunt quinque externi
Sensus ;

Oculus, 1. videt *Colores*,
quid album vel atrum,
viride vel cœruleum,
rubrum aut luteum, sit.

Auris, 2. audit *Sonos*,
tum naturales,
Voces & Verba ;
tum artificiales,

Musical Tunes.

The *Nose*, 3. scenteth smells and stinks.

The *Tongue*, 4. with the roof of the Mouth tastes *Savours*, what is sweet or bitter, keen or biting, sower or harsh.

The *Hand*, 5. by touching discerneth the quantity and quality of things; the hot and cold, the moist and dry, the hard and soft, the smooth and rough, the heavy and light.

The inward *Senses* are three.

The *Common Sense*, 7. under the *forepart of the head*, apprehendeth things taken from the outward Senses.

The *Phantasie*, 6. under the *crown of the head* judgeth of those things, thinketh and dreameth,

The *Memory*, 8. under the *hinder part of the head*, layeth up every thing and fetcheth them out: it loseth some, and this is *forgetfulness*.

Sleep, is the rest of the Senses.

Tonos Musicos.

Nasus, 3, *olfacit* odores & fœtores.

Lingua, 4. cum Palato gustat *Sapores*, quid dulce aut amarum, acre aut acidum, acerbum aut austerum.

Manus, 5. tangendo dignoscit quantitatem, & qualitatem rerum; calidum & frigidum, humidum & siccum, durum & molle, læve & asperum, grave & leve.

Sensus interni sunt tres.

Sensus Communis, 7. sub *sincipite* apprehendit res perceptas a Sensibus externis.

Phantasia, 6. sub *vertice*, dijudicat res istas, cogitat, somniat.

Memoria, 8. sub *occipitio*, recondit singula & depromit: deperdit quædam, & hoc est *oblivio*.

Somnus, est requies Sensuum.

The *Soul* is the Life of the Body, one in the whole.

Only *Vegetative* in *Plants*;

Withal *Sensitive* in *Animals* ;

And also rational in *Men*.

This consisteth in three things ;

In the *Understanding*, whereby it judgeth and understandeth a thing good and evil, or true, or apparent.

In the *Will*, whereby it chooseth, and desireth, or rejecteth, and misliketh a thing known.

In the *Mind*, whereby it pursueth

Anima est vita corporis, una in toto.

Tantum *Vegetativa* in *Plantis* ;

Simul *Sensitiva* in *Animalibus* ;

Etiam *Rationalis* in *Homine*.

Hæc consistet in tribus:

In *Mente* (Intellectu) quâ cognoscit, & intelligit, bonum ac malum, vel verum, vel apparens.

In *Voluntate*, quâ eligit, & concupiscit, aut rejicit, & aversatur cognitum.

In *Animo*, quo prosequitur

the Good chosen or avoid-
eth the Evil rejected.

Hence is *Hope* and *Fear*
in the desire,
and dislike.

Hence is *Love* and *Foy*,
in the Fruition:

But *Anger* and *Grief*,
in suffering.

The true judgment of a
thing is *Knowledge* ;
the false, is *Error*,
Opinion and *Suspicion*.

Bonum electum,
vel fugit Malum rejectum.

Hinc *Spes* & *Timor*,
in cupidine,
& aversatione :

Hinc *Amor* & *Gaudium*,
in fruitione :

Sed *Ira* ac *Dolor*,
in passione.

Vera cognitio rei,
est *Scientia* ;
falsa, *Error*,
Opinio, *Suspicio*.

XLIV.

Deformed and Monstrous People.

Deformes & Monstrosi.

Monstrous and *de-*
formed People are those
which differ in the Body
from the ordinary shape,

Monstrosi,
& *deformes* sunt
abeuntes corpore
à communi formâ,

as the huge *Gyant*, 1.

 The *blub-cheeked*, 8.
 The *goggle-eyed*, 9.

The Apparitions of the Moon.

Phases Lunæ.

The *Moon* shineth
 not by her own *Light*
 but that which is bor-
 rowed of the *Sun*.

For the one half of it
 is always enlightned, the
 other remaineth darkish.

Hereupon we see it in
Conjunction with the *Sun*, 1.
 to be obscure, almost none
 at all; in *Opposition*, 5.

Luna, lucet
 non sua propria *Luce*,
 sed mutuata
 a *Sole*.

Nam altera ejus medie-
 tas semper illuminatur,
 altera manet caliginosa.

Hinc videmus,
 in *Conjunctione Solis*, 1.
 obscuram, imo nullam :
 in *Oppositione*, 5.

whole and clear,
(and we call it
the *Full Moon* ;)
sometimes in the half,
(and we call it the *Prime*, 3.
and *last Quarter*, 7.)

Otherwise it waxeth, 2 . . 4.
or waneth, 6 . . 8.
and is said to be *horned*,
or more than half *round*.

The Eclipses.

Eclipses.

The *Sun*
is the fountain of light,
inlightning all things,
but the *Earth*, 1.
and the *Moon*, 2.
being shady bodies, are not
pierced with its rays, for
they cast a shadow upon
the place just over against
them.

Therefore,
when the Moon lighteth

Sol
est fons Lucis,
illuminans omnia ;
sed *Terra*, 1.
& *Luna*, 2.
Corpora opaca, non
penetrantur ejus radiis,
nam jaciunt umbram
in locum oppositum.

Ideo
cum *Luna* incidit

into the shadow of the *Earth*, 2. it is darkened, which we call an *Eclipse*, or defect.

But when the *Moon* runneth betwixt the *Sun* and the *Earth*, 3. it covereth it with its shadow; and this we call the *Eclipse* of the *Sun*, because it taketh from us the sight of the *Sun*, and its light; neither doth the *Sun* for all that suffer any thing, but the *Earth*.

in umbram *Terræ*, 2. obscuratur quod vocamus *Eclipsin* (deliquium) *Lunæ*.

Cum vero *Luna* currit inter *Solem* & *Terram*, 3. obtegit illum umbrâ suâ; & hoc vocamus *Eclipsin Solis*, quia adimit nobis prospectum *Solis*, & lucem ejus; nec tamen *Sol* patitur aliquid, sed *Terra*.

CXIV.

Gentilismus.

The *Gentiles* feigned
 to themselves near upon
 XIIM. *Deities*.

The chief of them were
Jupiter, 1. *President*, and
petty-God of Heaven;

Gentiles finxerunt

 XIIM. *Numina*.

Eorum præcipua erant
Jupiter, 1. *Præses* &
Deaster cæli;

Neptune, 2. of the Sea ;
Pluto, 3. of Hell ;
Mars, 4. of War ;
Apollo, 5. of Arts ;
Mercury, 6. of Thieves,
 Merchants,
 and Eloquence ;
Vulcan, (*Mulciber*)
 of Fire and Smiths ;
Æolus, of Winds :
 and the most obscene of
 all the rest, *Priapus*.

They had also
 Womanly Deities :
 such as were *Venus*, 7.
 the Goddess of Loves,
 and Pleasures, with
 her little son *Cupid*, 8.
Minerva (*Pallas*), with
 the nine *Muses of Arts* ;
Juno, of Riches and Wed-
 dings ; *Vesta*, of Chastity ;
Ceres, of Corn ;
Diana, of Hunting,
 and Fortune ;
 and besides these *Morbona*,
 and *Febris* her self.

The *Egyptians*,
 instead of God
 worshipp'd all sorts
 of Beasts and Plants,
 and whatsoever they saw
 first in the morning.

The *Philistines* offered
 to *Moloch*, 9. their Children
 to be burnt alive,

The *Indians*, 10. even to
 this day, worship the
Devil, 11.

Neptunus, 2. Maris ;

Apollo, 5. Artium ;
Mercurius, 6. Furum,

Minerva (*Pallas*), cum
 novem *Musis Artium* ;
Juno, Divitiarum & Nup-

Ceres, Frumentorum ;
Diana, Venationum ;

Yet the true *Worship* of the true *God*, remained with the *Patriarchs*, who lived before and after the Flood.

Amongst these, that Seed of the Woman, the *Messias* of the World, was promised to *Abraham*, 1. the Founder of the *Fews*, the Father of them that believe: and he (being called away from the *Gentiles*) with his *Posterity*, being marked with the *Sacrament of Circumcision*, 2. made a peculiar people, and *Church* of *God*.

Afterwards *God* gave his *Law*, written with his own *Finger* in *Tables of Stone*, 5. to this people

Verus tamen *Cultus* veri *Dei*, remansit apud *Patriarchas*, qui vixerunt ante & post *Diluvium*.

Inter hos, Semen illud *Mulieris*, *Messias* *Mundi*, promissus est *Abrahamo*. 1. *Conditori Fudæorum*, *Patri* credentium: & ipse (avocatus a *Gentilibus*) cum *Posteris*, notatus *Sacramento Circumcisionis*, 2. constitutus singularis *populus*, & *Ecclesia* *Dei*.

Postea *Deus* exhibuit *Legem* suam, scriptam *Digito* suo in *Tabulis Lapideis*, 5. huic *Populo*

by *Moses*, 3.

Furthermore, he ordained

manded a *Tabernacle*, 10.

down from Heaven.

From that time, being
the 30th year of his Age,
unto the fourth year, he
declared who he was, his
words and works manifest-

neither owned, nor enter-
tained by the *Fews*, because
of his voluntary poverty.

But when he had revived by his Divine Power, he rose again the third day out of the *Grave*, 10. and forty days after being taken up from *Mount Olivet*, 11. into *Heaven*, 12. and returning thither whence he came, he vanished as it were, while the *Apostles*, 13. gazed upon him, to whom he sent his *Holy Spirit*, 14. from *Heaven*, the tenth day after his *Ascension*, and them, (being filled with his power) into the World to preach of him; being henceforth to come again to the *last Judgment*, sitting in the mean time

talked with him,

Mahomet, 1.
